SEMINAR NOTICE**

Title: "Desired Environment Changes in the Prevention & Control of Liver Diseases".

Speaker: : Dr. Naresh Bhat

Chief of Gastroenterology & Hepatology
Aster CMI Hospital, Bangalore

Date: 29/07/2021

Time: 5.00 PM

Venue: Online using MS Teams

Abstract: Liver is an organ with complex functions, several environmental influences can affect it including infections and toxins. In my talk I will discuss the dietary and other toxins and their role in causation of liver and systemic disease. The role of the milieu exterior and interior needs to be understood to make it a healthier future.
