- GOLDEN AIM Presented INDIA'S MOST ICONIC ENVIRONMENTAL HEALTHCARE LEADER

Abstract:

For sustenance of life planetary and human health which are interrelated, is a must. The first planetary health started from Swissnex Trialogue at IISc between 1st to 5th Dec 2024 where invited multidisciplinary faculty discussed Air, Water, Soil, Global warming connected to human health.

The second trialogue was held in Zurich between 30th Aug to 3rd September 2026 in providing space for transactional discussion on how individual expertise can contribute to the health of the planet in a holistic way with new concept of house guiding framework, how different rooms contribute to the planetary and human health in kitchen, bathroom, bedroom, garden, forest, wetlands, rooftops, balconies, transport and infrastructure. How they contribute to carbon footprint and some mitigating measures are suggested.
