Abstract:

The Colorectal cancer is a common cancer worldwide and its incidence in India is increasing. The talk and seminar on “measures to mitigate intestinal cancer” briefly covers the structure of the small and large intestine, how the intestine functions, what are the reasons for intestinal cancers, how we can take measures to prevent this and what can be done to make early diagnosis and treat it in the best possible way. The societal and organization’s role in helping to prevent the intestinal cancer and supporting those who are suffering will be discussed.

All are Welcome
